DETAILED ACTION

1. Upon further review the following action is deemed merited. The examiner regrets the delayed prosecution of the claims.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Group I, claims 28 - 30, drawn to a system for use in a wireless purchasing environment, classified in class 235, and subclass 383.
- II. Group II, claims 31 - 34, drawn to a method for performing a wireless point-of-sale transactions, classified in class 705, and subclass 18.
- III. Group III, claims 35 - 46, drawn to a method for authorizing from an authorization processor to purchase an item, classified in class 705, and subclass 26.

3. Inventions Group I, Group II, and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I, has separate utility such as obtaining and/or utilizing an electronic coupon when purchasing a product and/or service. Invention Group II, has separate utility such as for communication and management of electronic receipt information. Invention Group III, has separate utility such as a payment

system that does not limit single transactions to a single account. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
